

COVID-19 Antibody Testing Now Available

- This antibody test does NOT test for the presence of COVID-19 disease but may indicate if you are eligible to donate plasma for people suffering from COVID-19.
- All successful donations will be tested for antibodies to SARS-CoV-2, the virus that causes COVID-19.
 - Please check your online donor account for results available within approximately 2-3 weeks after donation.
 - Look for an email with instructions on how to access your online account.
 - Provide your email address during registration to activate your online account post-donation. If you already have an account, you can log in with your username and password to view your test results.
- Do not donate if you are sick or are awaiting SARS-CoV-2 swab testing results to explain a recent illness or after contact with a COVID-19 positive individual.
